[The Native Races \(Complete 5 Part Edition\)](#) Oct 24 2020 The Native Races of the Pacific States is the magnum opus American historian and ethnologist Hubert Howe Bancroft who took upon himself the task of researching the exotic civilizations of the entire Pacific coast region. This region, from Alaska to Darien, including the whole of Mexico and Central America, he named the Pacific States. Before the arrival of Europeans, these territories were populated by aborigines, from the reptile-eating cave-dwellers of the Great Basin, to the Aztec and Maya civilization of the southern table-land. Volume 1 – Wild Tribes Volume 2 – Civilized Nations Volume 3 – Myths and Languages Volume 4 – Antiquities Volume 5 – Primitive History

[The Venetian Discovery of America](#) Apr 10 2022 Few Renaissance Venetians saw the New World with their own eyes. As the print capital of early modern Europe, however, Venice developed a unique relationship to the Americas. Venetian editors, mapmakers, translators, writers, and cosmographers represented the New World at times as a place that the city's mariners had discovered before the Spanish, a world linked to Marco Polo's China, or another version of Venice, especially in the case of Tenochtitlan. Elizabeth Horodowich explores these various and distinctive modes of imagining the New World, including Venetian rhetorics of 'firstness', similitude, othering, comparison, and simultaneity generated through forms of textual and visual pastiche that linked the wider world to the Venetian lagoon. These wide-ranging stances allowed Venetians to argue for their different but equivalent participation in the Age of Encounters. Whereas historians have traditionally focused on the Spanish conquest and colonization of the New World, and the Dutch and English mapping of it, they have ignored the wide circulation of Venetian Americana. Horodowich demonstrates how with their printed texts and maps, Venetian newsmongers embraced a fertile tension between the distant and the close. In doing so, they played a crucial yet heretofore unrecognized role in the invention of America.

[Global Perspectives in Modern Italian Culture](#) Nov 17 2022 Global Perspectives in Modern Italian Culture presents a series of unexplored case studies from the sixteenth to the twentieth century, each demonstrating how travellers, scientists, Catholic missionaries, scholars and diplomats coming from the Italian peninsula contributed to understandings of various global issues during the age of early globalization. It also examines how these individuals represented different parts of the world to an Italian audience, and how deeply Italian culture drew inspiration from the increasing knowledge of world 'Otherness'. The first part of the book focuses on the production of knowledge, drawing on texts written by philosophers, scientists, historians and numerous other first-hand eyewitnesses. The second part analyses the dissemination and popularization of knowledge by focussing on previously understudied published works and initiatives aimed at learned Italian readers and the general public. Written in a lively and engaging manner, this book will appeal to scholars and students of early modern and modern European history, as well as those interested in global history.

[Storia del Messico](#) Aug 14 2022 Con la presente Storia del Messico, l'autrice offre al lettore italiano una sintesi critica e aggiornata dei percorsi culturali, economici, politici e sociali che hanno plasmato il Messico odierno, fornendo al contempo una chiave di lettura, personale e non di rado innovativa, delle variegate dimensioni della sua contemporaneità. L'esposizione, integrata da un ricco apparato di cartine, grafici e tabelle, si snoda dall'epoca precolombiana al XXI secolo attraverso le grandi sfide di volta in volta affrontate dagli attori storici, con strategie spesso originali coronate da alterne fortune: l'impatto dell'invasione spagnola sulle culture autoctone; l'organizzazione interretnica del mondo coloniale; i fondamenti della nuova nazione indipendente e l'inserimento nello scacchiere internazionale; le tensioni tra federalismo e centralismo, tra Stato e Chiesa, tra città e campagne; il retaggio della rivoluzione e la questione sociale; il rapporto tra risorse demografiche e territoriali; la vicinanza degli Stati Uniti; il processo di democratizzazione e l'integrazione nei circuiti commerciali e diplomatici mondiali, fino alla partecipazione alle opportunità e ai rischi della globalizzazione. Un itinerario in costante dialogo con le storiografie passate e attuali, attento a evidenziare il gioco sottile tra opportunità e tentativi, e con esso le capacità di adattamento, concertazione e rielaborazione di soggetti storici ben lontani dai clichè riduttivi che hanno spesso imprigionato le figure di alcuni protagonisti; e che fa scoprire al lettore un grande paese, fornendogli inoltre gli strumenti per apprezzarne la traiettoria nazionale internazionale e potersi così interrogare sul suo prossimo futuro e sul suo ruolo nel mondo occidentale.

[Collecting East and West](#) Jan 07 2022 If collecting the rare and valuable is an entirely normal trait of human behaviour, amassing objects from far-away places has also long played a role in the history of collecting. “East” and “West”, or “North” and “South”, for that matter, are of course entirely relative to one’s particular geographical position. Therefore, it is interesting that collecting exotic objects is an endeavour that unites humanity over millennia and round the globe. The ancient Assyrians did so as assiduously as eighteenth-century collectors in Paris or London; Chinese emperors collected Western art and artefacts at a time when Western collectors started to gather ceramics, lacquered furniture, or South-East Asian prints. Key factors were, of course, increasingly frequent contact and an ever growing knowledge about the “other” and about the other’s artistic production. Of particular interest to the mission of this working group is the fact that the building of collections was only part of the endeavour but that, in many cases, the objects imported at huge cost and logistic effort were meant to be displayed in surroundings reminiscent of their original habitat, even though their exact original context may have been open to debate and their final exhibition surroundings may have been unrecognisable to anyone from their former home. Western collectors built Chinese cabinets for their exotic treasures, often complemented by depictions of Oriental tea parties. Less familiar is perhaps the fact that, from the seventeenth century onwards, Chinese emperors displayed their European collectibles in palaces built for them for this purpose in Western architectural style. The essays in the present volume, therefore, attempt to connect the collections of exotic objects with the forms of display adopted by collectors and institutions and thus chart the levels of increasingly informed and intimate encounters between East and West, scholars and collectors, art lovers and institutions from the early first millennium BC to the early twentieth century and from South-East Asia to North-Western Europe.

[Perceptions of Iran](#) Oct 16 2022 I.B.Tauris in association with the Iran Heritage Foundation From the Sasanian to the Safavid Empire, and from Qajar Iran to the current Islamic Republic, the history of Iran is one which has been coloured by a rich tradition of myths and narratives and shaped by its wealth of philosophers, cultural theorists and political thinkers. Perceptions of Iran dissects the construction of Iranian identity, to reveal how nationalism has been continually re-formulated and how Iran's self-perception has been moulded by its literary past. Here, Ali M. Ansari gathers together a varied and wide-ranging account of the long history of Iranian encounters with the Western world, whether via the observations of Herodotus, or the knowledge – via the Old Testament – of Cyrus liberating the Jews from Babylon, or into the modern era when nineteenth and twentieth century interactions reflect the unequal power relationship between Iran and the West. Perceptions of Iran also explores the salient elements in the country's narrative which helped to form Iran's identity, such as Ferdowsi's creation of the Shahnameh – the national epic – the exquisite architecture of Safavid Isfahan or the unfulfilled promise of the Constitutional Movement in the early twentieth century. It offers analysis of the Qajar Shahs' use of a mythical and dynastic past, as they drew on the narratives of Jamshid's glory and Khusraw's splendour in order to legitimise their rule. At the same time, it examines the ways in which foreign travellers and diplomats understood and conceived of the royal courts of Safavid Persia. As it covers 2,500 years of political and intellectual history, Perceptions of Iran ties together the diverse threads of Iranian experience that have underpinned the country's social and cultural movements, spanning Mirza Agha Khan Kermani's writing on Persian history and liberal nationalism, through to the strident anti- Western discourses of Seyyed Jamal al-Afghani, Jalal Al-e Ahmad and Ayatollah Khomeini. The book is therefore vital for researchers of Iranian history and those interested in the use of myth in the construction of national identity more widely.

[Imagining the Americas in Medici Florence](#) Dec 06 2021 The first full-length study of the impact of the discovery of the Americas on Italian Renaissance art and culture, *Imagining the Americas in Medici Florence* demonstrates that the Medici grand dukes of Florence were not only great patrons of artists but also early conservators of American culture. In collecting New World objects such as featherwork, codices, turquoise, and live plants and animals, the Medici grand dukes undertook a “vicarious conquest” of the Americas. As a result of their efforts, Renaissance Florence boasted one of the largest collections of objects from the New World as well as representations of the Americas in a variety of media. Through a close examination of archival sources, including inventories and Medici letters, Lia Markey uncovers the provenance, history, and meaning of goods from and images of the Americas in Medici collections, and she shows how these novelties were incorporated into the culture of the Florentine court. More than just a study of the discoveries themselves, this volume is a vivid exploration of the New World as it existed in the minds of the Medici and their contemporaries. Scholars of Italian and American art history will especially welcome and benefit from Markey’s insight.

[The Dispute of the New World](#) Feb 25 2021 When Hegel described the Americas as an inferior continent, he was repeating a contention that inspired one of the most passionate debates of modern times. Originally formulated by the eminent natural scientist Georges-Louis Leclerc, Comte de Buffon and expanded by the Prussian encyclopedist Cornelius de Pauw, this provocative thesis drew heated responses from politicians, philosophers, publicists, and patriots on both sides of the Atlantic. The ensuing polemic reached its apex in the latter decades of the eighteenth century and is far from extinct today. Translated in 1973, *The Dispute of the New World* is the definitive study of this debate. Antonello Gerbi scrutinizes each contribution to the debate, unravels the complex arguments, and reveals their inner motivations. As the story of the polemic unfolds, moving through many disciplines that include biology, economics, anthropology, theology, geophysics, and poetry, it becomes clear that the subject at issue is nothing less than the totality of the Old World versus the New, and how each viewed the other at a vital turning point in history.
