Written by an experienced artist and teacher, and generously illustrated with attractive how-to photos and drawings, it demonstrates a wealth of easy techniques in superb detail. Twenty dazzling projects--including a twisted wire choker, bangle bracelet, bead pod pin, and mixed metal earrings-- are created by wrapping, stitching, and folding metal, and by making cold connections with basic screws, bolts, pop rivets, eyelets, brads, and nails. Sophisticated photographs of each piece highlight its rich textures and visual complexity. Would-be jewelers will love this--and beadery, memory crafters, and anyone eager to explore metal jewelry will want it, too! Report on the work of the Ministry of Labour during 1920. It is a joint work between the United States, Canada, and Mexico that allows a high level of comparability between the countries. The NAICS officially replaced the SIC (Standard Industrial Classification) system in 1997. The publisher has included the SBA Size Standards Table as an appendix at the back of this book to assist users of the data.
