Lockheed F-80

Shooting Star

Pilot's Flight

Operating Manual

Oct 16 2019

Designed by

Lockheed's  
legendary engineer

Clarence "Kelly"

Johnson, the F-80

(first designated

P-80) "Shooting

Star" was one of the

world's first

operational jet

fighter aircraft.

After it missed

seeing combat in

WWII - four

prototype aircraft

were in Europe at war's end - the plane drew first blood in Korea in 1950. Variants included a photo recon version and the two-seat T-33, both of which saw heavy service in air forces around the world. Originally printed by Lockheed and the United States Air Force in the 1950s, this F-80 Flight Operating Manual taught pilots everything they needed to know before entering the cockpit. Classified "Restricted," the manual was recently declassified and is here reprinted in book form. This affordable facsimile has been reformatted and color images appear in black and

white. Care has been taken however to preserve the integrity of the text.
