In particular, the censorship criteria of dailies and periodicals testified to the vigilance of the authorities to control public discourse. The juxtaposition of everyday public discourse, literary renderings and political circumstances during the 1875-1878 uprising in Bosnia-Herzegovina, and the subsequent Austro-Hungarian occupation, shed new light on these historic events. The issues are being felt by all firms across the delivery chain – from clients to subcontractors. Capacity constraints almost always manifest themselves in prices. Increased tender prices have become the primary symptom of these supply-side issues. The main driver of new work output growth over the last 18 months is slowing. Both the public and private housing sectors are quickly reversing all of their recent upward trends when looked at on a yearly growth basis. The counterpoint to this is that the yearly growth figures are still positive, meaning that new work continues to flow. The main drivers are rising input costs. Producer price indices have moved up at a clip in recent quarters, with sharp increases in prices for materials and fuels consumed by UK manufacturers.
