Confronting Prejudice and Discrimination May 03 2021 Confronting Prejudice and Discrimination: The Science of Changing Minds and Behaviors focuses on confrontation as a strategy for reducing bias and discrimination. The volume tackles questions that people face when they wish to confront bias: What factors influence people's decisions to confront or ignore bias in its various forms? What are the motives and consequences of confrontation? How can confrontation be approached individually, through education and empowerment, and in specific contexts (e.g., health care) to yield favourable outcomes? These questions are paramount in contemporary society, where confrontation of bias is increasingly evident. Moreover, great strides in the scientific study of confrontation in the past 20 years has yielded valuable insights and answers. This volume is an essential resource for students and researchers with an interest in prejudice and prejudice reduction, and will also be valuable to non-academics who wish to stand up to bias through confrontation. Addresses factors that determine individuals' decisions to confront stereotyping, prejudice and discrimination Analyzes how personal and collective motives shape responses in confrontation-relevant situations Examines the consequences of confrontation from the perspectives of targets, perpetrators and bystanders Provides a roadmap for how to prepare for and engage in successful confrontations at the individual level Covers confronting bias in various settings including in schools, health care, the workplace and on the internet Discusses confrontation in the context of racism, sexism, sexual harassment and other forms of bias, including intersectional forms of bias

Digital Literacies for Learning Jul 05 2021 In the 21st century, digital tools enable information to be generated faster and in greater profusion than ever before, to the point where its extent and value are literally beyond imagining. Such quantities can only be meaningfully addressed using more digital tools, and thus our relationship to information is fundamentally changed. This situation presents a particular challenge to processes of learning and teaching, and demands a response from both information professionals and educators. Enabling education in a digital environment means not only changing the form in which learning opportunities are offered, but also enabling students to survive and prosper in digitally based learning environments. This collection brings together a global community of educators, educational researchers, librarians and IT strategists, to consider how learners need to be equipped in an educational environment that is increasingly suffused with digital technology. Traditional notions of literacy need to be challenged, and new literacies, including information literacy and IT literacy, need to be considered as foundation elements for digitally involved learners. Leading international experts from the USA, Canada, Australia, New Zealand, South Africa, Mexico and throughout Europe contribute to the debate, and Hannelore Rader, Librarian and Dean of the University Libraries, University of Louisville, Kentucky, provides the foreword. The book is in two parts: In Part 1, Literacies in the Digital Age, the contributors analyse how digital technologies have enabled transformative change in the ways in which learning can be constructed, and discuss the nature of the new literacies that have emerged in this new virtual and e-learning environment. In Part 2, Enabling and Supporting Digital Literacies, the contributors go on to consider the ways in which digital literacies can be made available to learners, and how these literacies are being relocated in a more student-centred environment within the broader perspective of learning. Readership: This book takes the issues raised in the successful Information and IT Literacy, also co-edited by Allan Martin, into a broader context. It is essential reading for all information professionals and educators involved in developing strategies and practices for learning in a digital age.

In the Time of the Butterflies Dec 18 2019 It is November 25, 1960, and three beautiful sisters have been found near their wrecked Jeep at the bottom of a 150-foot cliff on the north coast of the Dominican Republic. The official state newspaper reports their deaths as accidental. It does not mention that a fourth sister lives. Nor does it explain that the sisters were among the leading opponents of Gen. Rafael Leonidas Trujillo's dictatorship. It doesn't have to. Everybody knows of Las Mariposas—"The Butterflies." In this extraordinary novel, the voices of all four sisters—Minerva, Patria, María Teresa, and the survivor, Dedé—speak across the decades to tell their own stories, from hair ribbons and secret crushes to gunrunning and prison torture, and to describe the everyday horrors of life under Trujillo's rule. Through the art and magic of Julia Alvarez's imagination, the martyred Butterflies live again in this novel of courage and love, and the human cost of political oppression.

Another Bloody Chapter in an Endless Civil War Aug 18 2022 The period under review covers the years of 1984-87 - nearing the end of the third decade of the Troubles. It will use research and oral contributions from the mid to late 1980s and will show not only how the Provisional IRA (PIRA) grew in financial and logistical strength, but also how the Security Forces (SF) worked hard to contain them. It was also a period where the Republican terror group fully embraced Danny Morrison's mantra: 'The Armalite and the ballot box' as they moved toward a realization that the British military could not be beaten, but that they (PIRA) could at least sit down with them from a position of strength. Thereafter, their intention was not only political agitation, but also to keep up the terror campaign and force the British Government to talk; further to ensure that they - the British - accepted that there could only be an impasse (albeit one of continued violence). However, whilst they fought, talked and then fought again, a further 356 people died. This book will cover every major incident of the period - commencing with the ambush of an off-duty UDR soldier, Robert Elliott, through to the shameless bombing of Enniskillen. Significantly, both incidents were at the hands of the Provisional IRA. It will also look at the continued negative interference of the United States and the vast contribution of the Brit-hating Irish-Americans through NORaid, which ensured the killing and the violence would continue.

Nineteen Eighty-Four Jun 04 2021 "Nineteen Eighty-Four: A Novel", often published as "1984", is a dystopian social science fiction novel by English novelist George Orwell. It was published on 8 June 1949 by Secker & Warburg as Orwell's ninth and final book completed in his lifetime. Thematically, "Nineteen Eighty-Four" centres on the consequences of totalitarianism, mass surveillance, and repressive regimentation of persons and behaviours within society. Orwell, himself a democratic socialist, modelled the authoritarian government in the novel after Stalinist Russia. More broadly, the novel examines the role of truth and facts within politics and the ways in which they are manipulated. The story takes place in an imagined future, the year 1984, when much of the

world has fallen victim to perpetual war, omnipresent government surveillance, historical negationism, and propaganda. Great Britain, known as Airstrip One, has become a province of a totalitarian superstate named Oceania that is ruled by the Party who employ the Thought Police to persecute individuality and independent thinking. Big Brother, the leader of the Party, enjoys an intense cult of personality despite the fact that he may not even exist. The protagonist, Winston Smith, is a diligent and skillful rank-and-file worker and Outer Party member who secretly hates the Party and dreams of rebellion. He enters into a forbidden relationship with a colleague, Julia, and starts to remember what life was like before the Party came to power.

Moby Dick Mar 21 2020 Moby Dick is novel authored by the American Writer Herman Melville (1st August 1819 28th September 1891). He was not only a novelist but a poet as well. Moby Dick is best known work. The story illustrates about the whale world. The detailed and realistic narrations of whale hunting and of extracting whale oil. The story begins with a voyage and the captain, Ahab, of the ship is obsessive by nature. Ahab is still recovering from an encounter with a big whale, Moby Dick. Due to his obsession, he plans to kill the Moby Dick. So on their journey lots of obstacle and hurdles come. Even Ahab receives a prophecy related to his death, but he ignores. The whole story is in the ship and the voyage. How come it all happens? Whether Ahab's obsession got fulfilled? What happened to their ship who was pollard? All these queries seem interesting as relate to the whole story. pollard tells the full story to fellow Captains after his rescue from the Essex ordeal and to George Bevet. The voyage is 92 days in a leaking boat with no food. The Voyage is actually a whaling voyage. The 87-foot long ship is hit by a squall that destroys some part of the ship. The whale smashes head on into the ship. The whale passes underneath the ship begins thrashing of water. The water rushes into the ship. The story ends in an interesting manner. Most adventures story.

Launching a New Chapter in U.S.-Africa Relations Oct 20 2022 Africa's changing economic landscape is prompting a shift in how U.S. policymakers view the continent. High growth rates, new technologies, and a rapidly expanding consumer class are driving greater global competition for investment and access to potential export markets, and the United States is recognizing that it will need to step up its game to remain relevant and influential in an increasingly crowded and competitive environment.

In Cold Blood Oct 16 2019 Selected by the Modern Library as one of the 100 best nonfiction books of all time From the Modern Library's new set of beautifully repackaged hardcover classics by Truman Capote—also available are *Breakfast at Tiffany's* and *Other Voices, Other Rooms* (in one volume), *Portraits and Observations*, and *The Complete Stories* Truman Capote's masterpiece, *In Cold Blood*, created a sensation when it was first published, serially, in *The New Yorker* in 1965. The intensively researched, atmospheric narrative of the lives of the Clutter family of Holcomb, Kansas, and of the two men, Richard Eugene Hickock and Perry Edward Smith, who brutally killed them on the night of November 15, 1959, is the seminal work of the "new journalism." Perry Smith is one of the great dark characters of American literature, full of contradictory emotions. "I thought he was a very nice gentleman," he says of Herb Clutter. "Soft-spoken. I thought so right up to the moment I cut his throat." Told in chapters that alternate between the Clutter household and the approach of Smith and Hickock in their black Chevrolet, then between the investigation of the case and the killers' flight, Capote's account is so detailed that the reader comes to feel almost like a participant in the events.

The Maltreatment of Children Nov 28 2020 The maltreatment of children is an issue that has always been with us and civilized societies provide a range of services both social and medical to care for the children and families afflicted. In recent years, greater attention has been drawn to the medical aspects by competent authorities in the fields of forensic medicine, forensic psychiatry, epidemiological psychiatry, child psychiatry and family psychiatry; as well as the social aspects by those child welfare and child care agencies who have the difficult and distasteful task of removing children, with the help of the courts, from parents who can abuse them and are not able to care for them adequately. A multitude of social agencies, whose range of activities involve both the care and, where possible, the social betterment of afflicted families are now involved. Not least in importance is an increase in our global knowledge to help in the prevention or better treatment of these problems. This means more information on familial and genetic factors in human central nervous system development in its broadest sense. This would include how the central nervous system originates, mediates and controls the build up, speed of development and impulsive release, mastery and direction of aggressive drives and impulses. Very little is so far known about these factors.

Bishop and Chapter in Twelfth-Century England Feb 24 2023 This book is the first detailed examination on a comparative basis of the economic and political relations between the bishops and their cathedral clergy in England during the century and a half after the Conquest. In particular, it is a study of the structure and historical development of the mensal endowments and the redistribution of wealth which led, in the course of time, to the establishment of the chapter as a largely independent body with substantial political power. A description of the constitutional importance of the mensa and its treatment in recent scholarly writing is followed by a discussion of property rights and liberties in the church and the role of the bishop in ecclesiastical and civil government. The core of the book consists of an analysis based on contemporary sources of the episcopal and capitular organisation in each of the ten monastic and seven secular sees.
