"The Shadow of the Father" - one of the most important books of Jan Dobraczynski, is based on the record of the Gospel, the evangelical text. It shows Joseph, the guardian of the Holy Family as a human being subjected to obedience to God and his intentions, a man who must understand and accept his part of being a shadow of the true Father of Jesus who will be born by his Miriam-chosen to him by God. Joseph, a native of Bethlehem, heir to the heritage of kings David and Solomon and the noble tribe of Judah, is up to Nazareth in search of the woman for whom he will sacrifice his life. Over there he meets a charming, friendly, yet mysterious girl named Miriam. However, starting to understand that between Miriam and him stands an impetuous force of abysmal proportions, as God's fist, will make their relationship continue unexpected ways: the One Who

will be born and Who will become the liberator of the people scattered and oppressed in Israel. The book gives testimony to the values that never lose their importance: family, responsibility, patience, and true love." Following discussions on scientific biography carried out over the past few decades, this book proposes a kaleidoscopic survey of the uses of biography as a tool to understand science and its context. It offers food for thought on the role played by the gender of the biographer and the biographee in the process of writing. To provide orientation in such a challenging field, some of the authors have accepted to write about their own professional experience while reflecting on the case studies they have been working on. Focusing on (auto)biography may help us to build bridges between different approaches to men and women's lives in science. The authors belong to a variety of academic and professional fields, including the history of science, anthropology, literary studies, and science journalism. The period covered spans from 1732, when Laura Bassi was the first woman to get a tenured professorship of physics, to 2009, when Elizabeth H. Blackburn and Carol W. Greider were the first women's team to have won a Nobel Prize in science. "With reason Edith Stein has been called 'the most significant German woman of this century'. Her writings on woman are the fruit of both reflection and debate with other leaders of the Catholic feminist movement in German-speaking countries between the World Wars." This is the perfect teaching resource for children as well as an introduction to the basics of our Catholic faith for adults. Beautifully illustrated in a rich style reminiscent of medieval illuminations, this book follows the outline of the Catechism of the Catholic Church, with sections on the Creed, the Sacraments, the Commandments and Prayer. First published in 1974, and out of print for almost twenty years, Tamarisk Row is Gerald Murnane's first novel, and in many

respects his masterpiece, an unsparing evocation of a Catholic childhood in a Victorian country town in the late 1940s. In this Italian language volume, seventy-seven previously unpublished inventories collected from the Archivio de Stato in Bologna demonstrate the trends in taste and patronage in Bologna from the 1640s to the early eighteenth century, while a detailed essay by Raffaella Morselli provides the history of collecting in seventeenth-century Bologna. Cinquenta anos sem um minuto de descanso: viagens, escrutínios, visitas a diversas comunidades em Madri, Zamora, Barcelona, Paris, Roma, Florença, Ivrea... Ouvindo e ouvindo cada irmão sobre sua vida, seus sofrimentos e sua história, iluminando-a à luz da fé, da cruz gloriosa de Nosso Senhor Jesus. Carmen Hernández Barrera conheceu Kiko Argüello em Palomeras Altas (Madri) e juntos deram vida a uma nova forma de pregação que levou ao nascimento de uma pequena comunidade cristã: a primeira Comunidade Neocatecumenal. Carmen escreveu os seus diários por trinta anos, e os mesmos foram transcritos nesta obra para o bem espiritual dos irmãos do Caminho e da Igreja. A pioneering work in oral history, this book tells the story of the rise and fall of the industrial revolution and the apogee and crisis of the labor movement through an oral history of Terni, a steel town in Central Italy and the seat of the first large industrial enterprise in Italy. This story is told through a combination of stories, songs, myths and memories from over 200 voices of five generations, woven with a wealth of archival material. By any reckoning, the papacy of Pope Benedict XVI was extraordinary, with moments of high drama. Not the least of these was his resignation from office in February 2013, the first papal resignation in 500 years. But who is Joseph Ratzinger? In this definitive biography, based on meticulous historical research and many hours of taped interviews with his subject, Peter Seewald shows the exceptional circumstances in which the exceptionally talented son of a Bavarian policeman became the first German pope for 950 years. In this first volume, covering the years 1927–1965, we witness Joseph Ratzinger's early days, living above his father's police station. Ratzinger came to adulthood through the years of National Socialism. Though hostile to the rise of Hitler, his family knew well about Dachau and Ratzinger himself was conscripted into the Hitler Youth. Joseph Ratzinger proved to be a man of exceptional intellectual gifts and by the time of the Second Vatican Council (1962–1965) he was already noted as one of the outstanding intellects present and was nominated a 'peritus' or theological expert. This was also the time of the start of his friendship with the Swiss theologian Hans Küng who was to become his nemesis. Of his predecessor, Pope Francis has said: 'Pope Benedict was a great Pope, great for the penetration of his intelligence, great for his important contribution to theology, great for his love of the Church and human beings, great for his virtues and faith'.

Even in this first volume, we begin to understand how this came to be true. Since 1970, based in an isolated building situated on the peninsula of Posillipo, Pica Ciamarra Associati (www.pcaint.eu) has acted as a laboratory of architectural and urban design which has gradually incorporated new members and new energies over the time: using a multidisciplinary approach, the roots of the architectural practice lie in the intensive theoretical and practical work begun in the early 1960s by Massimo Pica Ciamarra. Since then the practice has been marked by a continuous relationship with Le Carré Bleu Feuille internationale d'architecture and leading members of the cultural milieu of Team 10: this has led to constant attention to everything that lies beyond form, to the relationship with contexts that also include non-spatial contexts, and to high levels of integration and dialectical discussion. According to Pica Ciamarra Associati, a design transcends the approaches of a single sector, providing simultaneous solutions to contradictory requirements, combining utopia and practicality. The poetics of the fragment: it mediates between architecture and the urban dimension; some designs also have the aim of becoming absorbed within a context as 'informed fragments'. This monograph is the result of an intensive period of work and consists of two interacting parts. It stems from research into the archive of the studio Pica Ciamarra and conversation with the members of the architectural practice. Organised diachronically, the book tells the long story, unfolding over a period of over fifty years of a team of Neapolitan architects and designers, who have maintained the lively spirit of the practice which is still geared towards the future. The textual and iconographic account tells a story and offers an interpretation that highlight the vibrant atmosphere of the studio, based on a consistency of thought and action, and fuelled by an interest in many different forms of knowledge. The contextualisation of the events related to the studio, as they unfolded over time, is wide-ranging, coherent and connotative. Antonietta Iolanda Lima, professor of history of architecture at the University of Palermo, has always tried, through theory, teaching and design, to disseminate the importance of history which can embracing innovation and tradition to an equal degree, forming a new architectural language. According to her view of architecture, history and design are closely connected, a 'single entity' as is reflected by her career. Since the 1980s, her academic work has gained increasing importance, a way of avoiding narrow sectoral approaches in the training of future architects, offering a holistic stance of the history of architecture and an architecture that contributes to shaping critical thought and a thriving cultural life. Now available in English for the first time, *Dictatorship* is Carl Schmitt's most scholarly book and arguably a paradigm for his entire work. Written shortly after the Russian Revolution and the First World War, Schmitt analyses the problem of the state of emergency and the power of the

Reichspräsident in declaring it. Dictatorship, Schmitt argues, is a necessary legal institution in constitutional law and has been wrongly portrayed as just the arbitrary rule of a so-called dictator. Dictatorship is an essential book for understanding the work of Carl Schmitt and a major contribution to the modern theory of a democratic, constitutional state. And despite being written in the early part of the twentieth century, it speaks with remarkable prescience to our contemporary political concerns.
