"Upgrading and Migrating to BizTalk Server 2016 outlines the various approaches to upgrading existing BizTalk solutions. The text works through specific examples of new maps and revised business processes, teaching readers to migrate a solution to a BizTalk Server Azure machine, as well as the time and costs associated with the move to BizTalk 2016. Also covered: core hardware and software requirements needed for the upgrade"-- A service-oriented architecture (SOA) is a vendor, product, or technology independent pattern that enables application components in a network to obtain services from other components. You can take advantage of the Microsoft Integration Stack to implement your SOA strategy smoothly and cost effectively. SOA Patterns with BizTalk Server 2013 and Microsoft Azure, Second Edition provides an overview of Microsoft Integration technologies, including BizTalk Server, and demonstrates how you can leverage these technologies to implement a successful SOA. Starting with an introduction to BizTalk Server and WCF, you will learn about RESTful services, JSON, and Azure Service Bus, and how to apply SOA principles to creating BizTalk solutions. Moving on, you will learn how to implement versioning in endpoints, orchestrations, and schemas. Finally, you will discover the usage of the ESB Toolkit and extend the connectivity of BizTalk Server applications to Microsoft Azure. An official training kit for the Microsoft BizTalk Server 2000 Exam 70-230 provides a self-paced approach that utilizes authoritative information, detailed instruction, case study exercises, and hands-on practice skills, with a searchable version of the study guide on CD-ROM. (Intermediate/Advanced) The market for Radio Frequency Identification (RFID) technology is expanding rapidly, constituting billions of dollars annually. As more organizations adopt RFID solutions and related equipment, the need to route, map, and execute workflows based on RFID data grows exponentially. Microsoft's solution to this demand is BizTalk RFID, an application built to distribute, track, analyze, and provide visibility into enterprise data collected using RFID technologies. To aid in the rapid understanding and adoption of BizTalk RFID, this book's authors have joined together to present Pro RFID in BizTalk Server 2009, the definitive resource for unlocking the potential of the application. With extensive code and configuration examples and multiple case studies illustrating how this application is being used in various industries, authors Ram Venkatesh, the lead developer of the BizTalk RFID platform, Mark Simms, a leading architect and developer of BizTalk RFID solutions, and Mark Beckner, a BizTalk Server and enterprise architecture specialist, ensure that you will gain the insight and master the tools necessary to be able to confidently and efficiently implement a BizTalk RFID solution. This work offers an easy-to-use learning tool including an eight-page blueprint section for additional visual instruction. Teaching readers how to use BizTalk, it provides implementation tips, in addition to providing an introduction to the technology.
