Japanese woodblock prints, or ukiyo-e, are the most recognizable Japanese art form. Their massive popularity

has spread from Japan to be embraced by a worldwide audience. Covering the period from the beginning of the Japanese woodblock print in the 1680s until the year 1900, *Japanese Woodblock Prints* provides a detailed survey of all the famous ukiyo-e artists, along with over 500 full-color prints. Unlike previous examinations of this art form, *Japanese Woodblock Prints* includes detailed histories of the publishers of woodblock prints—who were often the driving force determining which prints, and therefore which artists, would make it into mass circulation for a chance at critical and popular success. Invaluable as a guide for ukiyo-e enthusiasts looking for detailed information about their favorite Japanese woodblock print artists and prints, it is also an ideal introduction for newcomers to the world of the woodblock print. Utagawa Hiroshige (1797-1858) is one of the best known of all Japanese woodblock print designers. He is particularly renowned for his landscape prints, which are among the most frequently reproduced of all Japanese works of art. Their unusual compositions, humorous depictions of people involved in everyday activities and masterly expression of weather, light and seasons, proved enormously influential on many leading European artists. Aimed at a general audience, this book illustrates and discusses 53 Hiroshige landscape prints in the Ashmolean Museum's collection and explores their historical background. It gives a concise

introduction to Hiroshige's life and career within the context of Japan's booming nineteenth-century woodblock print industry and explores the development of the landscape print as a new genre in this period. It also discusses and illustrates the process and techniques of traditional Japanese woodblock print-making.
