Italian accounting has a long and honourable tradition of theoretical and applied analysis of the accounting and reporting function, perceived and defined much more broadly than in the Anglo-Saxon tradition. The high point of this perhaps, is the creation of what is known as Economia Aziendale (EA). The antecedents, genesis and later developments are presented here in detail by highly knowledgeable specialists in the field. EA takes as a prerequisite the necessity of the business (entity/azienda) to ensure its own long-run survival. This requires that the necessary resources are retained and preserved, so operating capital maintenance, by definition future-oriented, is essential. It requires a focus on the particular business organization, entity-specific and consistent with today's notion of the business model. Entity-specific information relevant to current and future cash flows is a necessary pre-requisite for ensuring long-run survival, which historical cost accounting, or fair value (being market-

specific not entity-specific) satisfactorily achieve. Flexibility of valuation and of reporting, always relevant to the specific asset at the specific time in the specific place, is a necessary condition for effective management. This is exactly the focus of EA and its analysis and tradition. Scholars and advanced students of international regulation and accounting, as well as accounting history, will find this an invaluable guide to a vibrant, scholarly tradition of great practical relevance today. The neural computational approach to cognitive and psychological processes is relatively new. However, Neural Computation and Psychology Workshops (NCPW), first held 16 years ago, lie at the heart of this fast-moving discipline, thanks to its interdisciplinary nature ? bringing together researchers from different disciplines such as artificial intelligence, cognitive science, computer science, neurobiology, philosophy and psychology to discuss their work on models of cognitive processes. Once again, the Eleventh Neural Computation and Psychology Workshop (NCPW11), held in 2008 at the University of Oxford (England), reflects the interdisciplinary nature and wide range of backgrounds of this field. This volume is a collection of peer-reviewed contributions of most of the papers presented at NCPW11 by researchers from four continents and 15 countries. The Academy is a prestigious international institution for the study and teaching of Public and Private International Law and related subjects. The work of the Hague Academy receives the support and recognition of the UN. Its purpose is to encourage a thorough and impartial examination of the problems arising from international relations in the field of law. The courses deal with the theoretical and practical aspects of the subject, including legislation and case law. All courses at the Academy are, in principle, published in the language in which they were delivered in the "Collected Courses of the Hague Academy of International Law". This book was born with a dual purpose. The first is to provide the hairstylist a suitable tool to deal with the problems they encounter in their daily work. I am

sure many times it just happened to have an inventory shortage or even to find ourselves out of stocks in the warehouse, and we had to remedy with resourcefulness and tricks acquired from the experience accumulated over the years in our profession. The second purpose is to provide a real teaching tool for all those who come to this world of theory, practice, and lots of creativity.

Getting familiar with the issues of colorimetry and apply them with satisfactory results, is not easy. Contents of the book: - 1.0 Biology - 2.0 Chemistry - 3.0 Tricho-chemistry - 4.0 Tricho-care - 5.0 Chemicals to avoid - 6.0 Applied colorimetry - 7.0 Conceptual maps - 8.0 Glossary - 9.0 Index - 10.0 References - 57 Figures - 18 Conceptual maps - 7 Formulas - 7 Charts - 7 Tests and verifications

The study presented in this volume considers an essential topic of revealed truth, namely the Holy Spirit's role in the Paschal Mystery. Theological research has been particularly concerned with this question in recent years, endeavouring more and more to clarify and define the relations between Christ and the Holy Spirit, emphasizing the Spirit's action in the life and mission of the Savior. J. Anderson considers this theme within a very precise framework: that of the Second Vatican Council, *Ad Gentes I*, 2-5, . The conciliar text is brief but full of meaning and this merits a thorough examination. This is the first time that a systematic study is presented to us on the subject of this text. It is carried out with great care. The author retraces in detail the different stages of the text's redaction, and notes the corrections which have been conserved, but also the recollections and notes of those who collaborated in the redaction. He has taken the trouble to consult personally several of these collaborators. It is this consultation that helps to give a great value to his study. The work includes valuable information which no future study of the conciliar Decree can afford to overlook. By concentrating on an analysis of the text, the author determines the elements of a pneumatology in conjunction with the Pascal Mystery. He thus provides a sure basis for the reflection of theologians who wish to

understand better the role of the Holy Spirit in the missionary activity of the Church. Let us hope that this remarkable contribution will receive the appreciation which it merits and will evoke an interest leading to further pneumatological research

Dirty Money tells the story of Dotun Oloko, a whistleblower who tries to expose what he suspected was the involvement of the British government and European institutions in the laundering of millions of dollars of money stolen from Nigeria by James Ibori, the corrupt former governor of one of the country's oil rich states. Suspecting colossal fraud and corruption, Oloko reports the facts to the UK Department for International Development and the European Investment Bank - only to find his family placed under covert surveillance. In the end, Ibori will be sentenced by a London court for fraud and money laundering. But the Western institutions that Oloko alleged were complicit are still in business.

Bound by Distance takes its place among a growing body of scholarship the goal of which is to challenge the kind of thinking that reproduces the "West" as a stable and homogenous political and discursive entity. The Italian nation, with its peculiar process of formation, the continuous tensions between its own northern and southern regions, and its history of emigration, provides an important case for complicating and reassessing concepts of national, racial, economic, and cultural dominance. The author analyzes the interactive space of the history of Italian state formation, Italian subaltern literature, Italian emigrant writing, and the current situation of North African and Asian immigrants to Italy, in order to contest the "feigned homogeneity" of the Italian nation and to complicate and reassess concepts of national, racial, economic, and cultural dominance. This book reprints various essays on gay history from around Europe and America. Includes one essay in German and one in Italian. This book presents the second volume of Piola's original Italian text together with the English-language translation and comments, showing convincingly that Gabriolo Piola's work must still be

regarded as a modern theory. Gabrio Piola's work has had an enormous impact on the development of applied mathematics and continuum mechanics. As such, a committee of scientific experts took it upon themselves to translate his complete works. In a second step, they commented on Piola's work and compared it to modern theories in mechanics in order to stress Piola's impact on modern science and prove and confirm that he achieved significant milestones in applied mathematics. If you're afraid then you are fucked. The hunter can always smell his prey. There will be no one to protect you tonight. The river flows slowly and echoes through the steps that hide beyond the cone of light from the street lamp. Eight stories of violence, passion, fear and a fascination with evil tell about the most intriguing, bloody and controversial metropolis in the world. New York is not just that, of course. A deep beauty is stuck deep into the soul of this city. But tonight the pencils and the words of young crime story authors will take you beyond the lights of the skyscrapers, beyond the smoky bars. Tonight you will navigate by sight across the East River which will take you far away, among secrets and fears. There is a strange moon that eases the navigation, that sharpens the smell, and the pleasure of the journey. It is time to move, the night will not wait. The hunt has begun. Limited edition, in english, with the contribution of Stan Lee and Matthew Modine!
