This book constitutes the refereed proceedings of the 12th Latin American Robotics Symposium and Third Brazilian Symposium on Robotics, LARS 2015 / SBR 2015, held in Uberlândia, Brazil, in October/November 2015. The 17 revised full papers presented were carefully reviewed and selected from 80 submissions. The selected papers present a complete and solid reference of the state-of-the-art of intelligent robotics and automation research, covering the following areas: autonomous mobile robots, tele-operated and telepresence robots, human-robot interaction, trajectory control for mobile robots, autonomous vehicles, service-oriented robotic systems, semantic mapping, environment mapping, visual odometry, applications of RGB-D sensors, humanoid and biped robots, Robocup soccer robots, robot control, path planning, multiple vehicles and teams of robots. /div As the citizens of Venice compete for advantageous marriages, wealth, and status, a moneylender is intent on deadly revenge. Mistrust and resentment thrive in Shakespeare's dark comedy. Under the editorial supervision of Jonathan Bate and Eric Rasmussen, two of today's most accomplished Shakespearean scholars, this Modern Library series incorporates definitive texts and authoritative notes from William Shakespeare: Complete Works. Each play includes an Introduction as well as an overview of Shakespeare's theatrical career; commentary on past and current productions based on interviews with leading directors, actors, and designers; scene-by-scene analysis; key facts about the work; a chronology of Shakespeare's life and times; and black-and-white illustrations. Ideal for students, theater professionals, and general readers, these modern and accessible editions from the Royal Shakespeare Company set a new standard in Shakespearean literature for the twenty-first century. This book presents peer-reviewed articles from the 6th International Conference on Wireless Technologies, Embedded and Intelligent Systems (WITS 2020), held at Fez, Morocco. It presents original research results, new ideas and practical lessons learnt that touch on all aspects of wireless technologies, embedded and intelligent systems. WITS is an international conference that serves researchers, scholars, professionals, students and academicians looking to foster both working relationships and gain access to the latest research results. Topics covered include Telecoms & Wireless Networking Electronics & Multimedia Embedded & Intelligent Systems Renewable Energies. This book explores the student discontent a year after the start of the 2015 South African #FeesMustFall revolt #FeesMustFall, the student revolt that began in October 2015, was an uprising against lack of access to, and financial exclusion from, higher education in South Africa. More broadly, it radically questioned the socio-political dispensation resulting from the 1994 social pact between big business, the ruling elite and the liberation movement. The 2015 revolt links to national and international youth struggles of the recent past and is informed by black consciousness politics and social movements of the international left. Yet, its objectives are more complex than those of earlier struggles. The student movement has challenged the hierarchical, top-down leadership system of university management and its 'double speak' of professing to act in workers' and students' interests yet entrenching a regressive system for control and governance. University managements, while on one level amenable to change, have also co-opted students into their ranks to create co-responsibility for the highly bureaucratized university financial aid that stands in the way of their social revolution. This book maps the contours of student discontent a year after the start of the #FeesMustFall revolt. Student voices dissect colonialism, improper compromises by the founders of democratic South Africa, feminism, worker rights and meaningful education. In-depth assessments by prominent scholars reflect on the complexities of student activism, its impact on national and university governance, and offer provocative analyses of the power of the revolt. Essays that address the question: how can people and class agency change this destructive course of history? Capitalism's addiction to fossil fuels is heating our planet at a pace and scale never before experienced. Extreme weather patterns, rising sea levels and accelerating feedback loops are a commonplace feature of our lives. The number of environmental refugees is increasing and several island states and low-lying countries are becoming vulnerable. Corporate-induced climate change has set us on an ecocidal path of species extinction. Governments and their international platforms such as the Paris Climate Agreement deliver too little, too late. Most states, including South Africa, continue on their carbon-intensive energy paths, with devastating results. Political leaders across the world are failing to provide systemic solutions to the climate crisis. This is the context in which we must ask ourselves: how can people and class agency change this destructive course of history? Volume three in the Democratic Marxism series, The Climate Crisis investigates eco-socialist alternatives that are emerging. It presents the thinking of leading climate justice activists, campaigners and social movements advancing systemic alternatives and developing bottom-up, just transitions to sustain life. Through a combination of theoretical and empirical work, the authors collectively examine the challenges and opportunities inherent in the current moment. This volume builds on the class-struggle focus of Volume 2 by placing ecological issues at the centre of democratic Marxism. Most importantly, it explores ways to renew historical socialism with democratic, eco-socialist alternatives to meet current challenges in South Africa and the world. At last, here is a baseline book for anyone who is confused by cryptic computer programs, algorithms and formulae, but wants to learn about applied bioinformatics. Now, anyone who can operate a PC, standard software and the internet can also learn to understand the biological basis of bioinformatics, of the existence as well as the source and availability of bioinformatics software, and how to apply these tools and interpret results with confidence. This process is aided by chapters that introduce important aspects of bioinformatics, detailed bioinformatics exercises (including solutions), and to cap it all, a glossary of definitions and terminology relating to bioinformatics. Maximum PC is the magazine that every computer fanatic, PC gamer or content creator must read. Each and every issue is packed with punishing product reviews, insightful and innovative how-to stories and the illuminating technical articles that enthusiasts crave. Trade flows and trade policies need to be properly quantified to describe, compare, or follow the evolution of policies between sectors or countries or over time. This is essential to ensure that policy choices are made with an appropriate knowledge of the real conditions. This practical guide introduces the main techniques of trade and trade policy data analysis. It shows how to develop the main indexes used to analyze trade flows, tariff structures, and non-tariff measures. It presents the databases needed to construct these indexes as well as the challenges faced in collecting and processing these data, such as measurement errors or aggregation bias. Written by experts with practical experience in the field, A Practical Guide to Trade Policy Analysis has been developed to contribute to enhance developing countries' capacity to analyze and implement trade policy. It offers a hands-on introduction on how to estimate the distributional effects of trade policies on welfare, in particular on inequality and poverty. The guide is aimed at government experts engaged in trade negotiations, as well as students and researchers involved in trade-related study or research. An accompanying DVD contains data sets and program command files required for the exercises. Copublished by the WTO and the United Nations Conference on Trade and Development From one of America's most popular short story writers and an Academy Award nominee: the O. Henry Award-winning tale that inspired the movie The Hunt. A subject of mysterious rumors and superstition, the deserted Caribbean Island was shrouded in an air of peril. To Sanger Rainsford, who fell off a yacht and washed up on its shores, the abandoned isle was a welcome paradise. But unknown to the big-game hunter, a predator lurked in its lush jungles—one more dangerous than any he had ever encountered: a human. First published in 1924, this suspenseful tale "has inspired serial killers, films and stirred controversy in schools. A century on, the story continues to thrill" (The Telegraph). "[A] tense, relentless story of man-against-man adventure, in which the hunter Sanger Rainsford learns, at the hands of General Zaroff, what it means to be hunted." —Criterion Rhea looks at the initial campaign between Ulysses S. Grant and Robert E. Lee between May 13 and 25, 1864—a phase that was critical in the clash between the Army of the Potomac and the Army of Northern Virginia. Rhea charts the generals' every step and misstep in their efforts to outfox each other. 12 halftones. 29 maps. The xenophobic attacks that started in Alexandra, Johannesburg in May 2008 before quickly spreading around the country caused an outcry across the world and raised many fundamental questions: Of what profound social malaise is xenophobia – and the violence that it inspires – a symptom? Have our economic and political choices created new forms of exclusion that fuel anger and distrust? What consequences does the emergence of xenophobia hold for the idea of an equal, non-racial society as symbolised by a democratic South Africa? On 28 May 2008 the Faculty of Humanities in the University of the Witwatersrand, Johannesburg convened an urgent colloquium that focused on searching for short and long-term solutions. Nearly twenty individuals – mostly Wits academics from a variety of disciplines, but also two student leaders, a journalist and a bishop – addressed the unfolding violence in ways that were conversant with the moment, yet rooted in scholarship and ongoing research. Go Home or Die Here emanates directly from the colloquium. It hopes to make sense of the nuances and trajectories of building a democratic society out of a deeply divided and conflictual past, in the conditions of global recession, heightening inequalities and future uncertainty. The authors hoped to pose questions that would lead both to research and to more informed, reflective forms of public action. With extensive photographs by award-winning photographer Alon Skuy, who covered the violence for The Times newspaper, the volume is passionate and engaged, and aims to stimulate reflection, debate and activism among concerned members of a broad public. When it comes to murder it's all in a name When magistrate Matteo Arconti's namesake, an insurance man from Milan, is found dead outside the court buildings in Piazzale Clodio, it's a coded warning to the authorities - a clear message of defiance and intimidation. Commissioner Alec Blume, all too familiar with Rome's criminal underclass, knows little of the Calabrian mafia currently under investigation by the magistrate. Handing control of the murder inquiry to his now live-in and not-so-secret partner Caterina Mattioli, Blume takes a back seat. But while Caterina questions the dead man's widow, Blume has an underhand idea of his own to lure the arrogant mafioso out of his hiding place... The contributors to Competition Law and Economic Regulation: Addressing Market Power in southern Africa critically assess the efficacy of the competition and economic regulation frameworks, including the impact of a number of the regional competition authorities in a range of sectors throughout southern Africa. Featuring academics as well as practitioners in the field, the book addresses issues common to southern African countries, where markets are small and concentrated, with particularly high barriers to entry, and where the resources to enforce legislation against anti-competitive conduct are limited. What is needed, the contributors argue, is an understanding of competition and regional integration as part of an inclusive growth agenda for Africa. By examining competition and regulation in a single framework, and viewing this within the southern African experience, this volume adds new perspectives to the global competition literature. It is an essential reference tool and will be of great interest to policymakers and regulators, as well as the rapidly growing ecosystem of legal practitioners and economists engaged in the field. Edited by the author of The Sellout, winner of the 2016 Man Booker Prize, Hokum is a liberating, eccentric, savagely comic anthology of the funniest writing by black Americans. This book is less a comprehensive collection than it is a mix-tape narrative dubbed by a trusted friend—a sampler of underground classics, rare grooves, and timeless summer jams, poetry and prose juxtaposed with the blues, hip-hop, political speeches, and the world's funniest radio sermon. The subtle musings of Toni Cade Bambara, Henry Dumas, and Harryette Mullen are bracketed by the profane and often loud ruminations of Langston Hughes, Darius James, Wanda Coleman, Tish Benson, Steve Cannon, and Hattie Gossett. Some of the funniest writers don't write, so included are selections from well-known yet unpublished wits Lightnin' Hopkins, Mike Tyson, and the Reverend Al Sharpton. Selections also come from public figures and authors whose humor, although incisive and profound, is often overlooked: Malcolm X, Suzan-Lori Parks, Zora Neale Hurston, Sojourner Truth, and W.E.B. Dubois. Groundbreaking, fierce, and hilarious, this is a necessary anthology for any fan or student of American writing, with a huge range and a smart, political grasp of the uses of humor. Society, globally, has entered into what might be called the "service economy." Services now constitute the largest share of GDP in most countries and provide the major source of employment in both developed and developing countries. Services permeate all aspects of peoples' lives and are becoming inseparable from most aspects of economic activity. "Quality management" has been a dominating managerial practice since World War II. With quality management initially associated with manufacturing industries, one might assume the relevance of quality management might decrease with the emergence of the service economy. To the contrary, the emergence of the service economy strengthened the importance of quality issues, which no longer are associated only with manufacturing industries but are increasingly applied in all service sectors, as well. Today, we talk not only about product or service quality but have even expanded the framework of quality to quality of life and quality of environment. Thus, quality and services have emerged in parallel as closely interrelated fields. The Encyclopedia of Quality and the Service Economy explores such relevant questions as: What are the characteristics, nature, and definitions of quality and services? How do we define quality of products, quality of services, or quality of life? How are services distinguished from goods? How do we measure various aspects of quality and services? How can products and service quality be managed most effectively and efficiently? What is the role of customers in creation of values? These questions and more are explored within the pages of this two-volume, A-to-Z reference work. Covering fifteen popular genres, each chapter includes a definition of the genre, its characteristics and appeal elements (such as character development, story line, and frame), and its key authors and subgenres. With current information on the newest technology, this book starts by helping readers make informed purchasing decisions. Clear and easy-to-understand instructions with numerous photos guide you through today's most common upgrades and repairs. From the fastest processors and clock-doublers to the most modern multimedia components or simply replacing your battery, this book covers it all. #1 NEW YORK TIMES BESTSELLER • More than one million copies sold! A "brilliant" (Lupita Nyong'o, Time), "poignant" (Entertainment Weekly), "soul-nourishing" (USA Today) memoir about coming of age during the twilight of apartheid "Noah's childhood stories are told with all the hilarity and intellect that characterizes his comedy, while illuminating a dark and brutal period in South Africa's history that must never be forgotten."—Esquire Winner of the Thurber Prize for American Humor and an NAACP Image Award • Named one of the best books of the year by The New York Time, USA Today, San Francisco Chronicle, NPR, Esquire, Newsday, and Booklist Trevor Noah's unlikely path from apartheid South Africa to the desk of The Daily Show began with a criminal act: his birth. Trevor was born to a white Swiss father and a black Xhosa mother at a time when such a union was punishable by five years in prison. Living proof of his parents' indiscretion, Trevor was kept mostly indoors for the earliest years of his life, bound by the extreme and often absurd measures his mother took to hide him from a government that could, at any moment, steal him away. Finally liberated by the end of South Africa's tyrannical white rule, Trevor and his mother set forth on a grand adventure, living openly and freely and embracing the opportunities won by a centuries-long struggle. Born a Crime is the story of a mischievous young boy who grows into a restless young man as he struggles to find himself in a world where he was never supposed to exist. It is also the story of that young man's relationship with his fearless, rebellious, and fervently religious mother—his teammate, a woman determined to save her son from the cycle of poverty, violence, and abuse that would ultimately threaten her own life. The stories collected here are by turns hilarious, dramatic, and deeply affecting. Whether subsisting on caterpillars for dinner during hard times, being thrown from a moving car during an attempted kidnapping, or just trying to survive the life-and-death pitfalls of dating in high school, Trevor illuminates his curious world with an incisive wit and unflinching honesty. His stories weave together to form a moving and searingly funny portrait of a boy making his way through a damaged world in a dangerous time, armed only with a keen sense of humor and a mother's unconventional, unconditional love. InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects. The seventh edition of Camp Counseling continues in the successful tradition of the six previous editions, emphasizing face-to-face leadership skills and programming ideas for the organized camp. In addition, the latest edition presents a fresh contemporary view of the trends, philosophies, and practices of the modern organized camp movement. New sections have been included to discuss important topics such as behavior management, environmental concerns, common health problems, and much more. This book draws together two domains of psychological theory, Vygotsky's cultural-historical theory of cognition and narrative theories of identity, to offer a way of rethinking the human subject as embodied, relational and temporal. A dialogue between these two ostensibly disparate and contested theoretical trajectories provides a new vantage point from which to explore questions of personal and political change. In a world of deepening inequalities and increasing economic precarity, the demand for free, decolonised quality education as articulated by the South African Student Movement and in many other contexts around the world, is disrupting established institutional practices and reinvigorating possibilities for change. This context provokes new lines of hopeful thought and critical reflection on (dis)continuities across historical time, theories of (social and psychological) developmental processes and the practices of intergenerational life, particularly in the domain of education, for the making of emancipatory futures. This is essential reading for academics and students interested in Vygotskian and narrative theory and critical psychology, as well as those interested in the politics and praxis of higher education. No single human invention has transformed war more than the airplane—not even the atomic bomb. Even before the Wright Brothers' first flight, predictions abounded of the devastating and terrible consequences this new invention would have as an engine of war. Soaring over the battlefield, the airplane became an unstoppable force that left no spot on earth safe from attack. Drawing on combat memoirs, letters, diaries, archival records, museum collections, and eyewitness accounts by the men who fought—and the men who developed the breakthrough inventions and concepts—acclaimed author Stephen Budiansky weaves a vivid and dramatic account of the airplane's revolutionary transformation of modern warfare.
