Pathology of Asbestos-Associated Diseases integrates the newest research and advances in its discussion of asbestos-induced diseases. Organized in 13 chapters, the book begins with background information on the mineralogy of asbestos, occupation and environmental exposure to asbestos, and asbestosis. A detailed discussion on mesothelioma includes a historical background, addresses etiologic considerations and epidemiology, pathologic features, differential diagnosis and treatment and prognosis. Guidelines for assessing and identifying asbestos-associated carcinomas of the lung, including histopathology and differential diagnosis, are discussed. The text also addresses the explosion of research in the area of molecular biology and the abundance of information bearing on the mechanisms by which asbestos causes disease. Chapters also cover cytopathology and experimental models of asbestos-related diseases. The

diseases associated with asbestos have significant medico-legal implications, and there are two chapters dedicated to addressing the issue. More than 190 illustrations complement the text. An invaluable reference for the pathologist, pulmonologist, radiologist, and occupational medical practitioner interested in asbestos-related disease as well as malpractice attorneys needing an understanding of asbestos, the diseases it induces, prognosis and clinical implications. Wiggerman's study of Mesopotamian monsters bridges the gap between text and image. Wooden and clay figures of monstrous spirits such as Hairy-One (lahmu), Bison-Bull (kusarikku), and Furious-Snake (mushussu) stand guard at the entrances to buildings to protect the inhabitants from demonic intruders. Deriving his information from the ritual texts that describe the production and installation of these figures, the author identifies the monsters of the texts with objects from the archaeological record and presents a detailed discussion of the identities and histories of a variety of Mesopotamian monsters. Excerpt from *Lectures on the Origin and Growth of Religion: As Illustrated by the Religion of the Ancient Babylonians* A word of apology is needed for the numerous repetitions in the following chapters, which are due to the fact that the chapters were written and delivered in the form of Lectures. I cannot guarantee the exactness of every word in the translations of the cuneiform texts given in them. The meaning of individual words may at times be more precisely defined by the discovery of fuller materials, even where it has been supposed that their signification has been fixed with

certainty. The same fate has befallen the interpretation of the Hebrew Scriptures, and is still more likely to befall a progressive study like Assyrian. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works. The book offers a comprehensive analytic comparison between the images of primeval history in Babylonia, in the Hebrew Bible and the parallel Enochic traditions. It presents new interpretations of each of these traditions and how they relate to each other. The scholarly world first became aware of the myth of Adapa and the South Wind when it was discovered on a tablet from the El-Amarna archive in 1887. We now have at our disposal six fragments of the myth. The largest and most important fragment, from Amarna, is dated to the 14th century B.C.E. This fragment of the Adapa myth has red-tinted points applied on the tablet at specific intervals. Izre'el draws attention to a few of these points that were missed in previous publications by Knudtzon and Schroeder. Five other fragments were part of the Assurbanipal library and are representative of this myth as it was known in

Assyria about seven centuries later. The discovery of the myth of Adapa and the South Wind immediately attracted wide attention. Its ideology and its correspondence to the intellectual heritage of Western religions precipitated flourishing studies of this myth, both philological and substantive. Many translations have appeared during the past century, shedding light on various aspects of the myth and its characters. Izre'el unveils the myth of Adapa and the South Wind as mythos, as story. To do this, he analyzes the underlying concepts through extensive treatment of form. He offers an edition of the extant fragments of the myth, including the transliterated Akkadian text, a translation, and a philological commentary. The analysis of poetic form that follows leads to understanding the myth as a piece of literature and to uncovering its meanings. This study therefore marks a new phase in the long, extensive research into this Mesopotamian myth.

Are humans at their core seekers of their own pleasure or cooperative members of society? Paradoxically, they are both. Pleasure-seeking can take place only within the context of what works within a defined community, and central to any community are the evolved codes and principles guiding appropriate behavior, or morality. The complex interaction of morality and self-

interest is at the heart of Geoffrey M. Hodgson's approach to evolutionary economics, which is designed to bring about a better understanding of human behavior. In *From Pleasure Machines to Moral Communities*, Hodgson casts a critical eye on neoclassical individualism, its foundations and flaws, and turns to recent insights from research on the evolutionary bases of human behavior. He focuses his attention on the evolution of morality, its meaning, why it came about, and how it influences human attitudes and behavior. This more nuanced understanding sets the stage for a fascinating investigation of its implications on a range of pressing issues drawn from diverse environments, including the business world and crucial policy realms like health care and ecology. This book provides a valuable complement to Hodgson's earlier work with Thorbjørn Knudsen on evolutionary economics in *Darwin's Conjecture*, extending the evolutionary outlook to include moral and policy-related issues. TEM and SEM have contributed greatly to the progress of various research fields, which has been accelerated in the last few decades by highly functional electron microscopes and microscopy. In this tide of microscopy, various microscopic methods have been developed to make clear many unsolved

problems, e.g. pulse beam TEM, environmental microscopy, correlative microscopy, etc. In this book, a number of reviews have been collected concerning these subjects. We think that the content in each chapter is impressive, and we hope this book will contribute to future advances in electron microscopy, materials science, and biomedicine.
