This book sets out to give over ten techniques and systems for betting on 6-trap UK BAGS greyhound races. These systems are illustrated and explained in simple and easy to follow steps. A day at the races, with its colorful variety and fast-paced action, appeals to people from all walks of life. Not surprisingly, the idea of going home with a few more dollars than when one arrived is part of horseracing's charm. In this entertaining but substantive volume, two

distinguished economists, who happen to be horseracing buffs, outline a tested strategy for placing bets that will increase the reader's chances of a happy outcome at the track. The authors are the first to point out that getting rich at the racetrack is unlikely. They do maintain, however, that with attention to their systematic approach, the racing fan can achieve the best possible chance at winning. In the process, the reader learns some of the most important measurement techniques in the social sciences, as well as the basic methods of market analysis. The methods and angles that follow have been among Ken Osterman's favorites over the years. They have been developed and tested on races at racetracks all over the country. There are systems that cover all three main breeds of horse racing: thoroughbreds, quarter horses, and standardbreds. The rules of the handicapping angle are clearly explained and easy to find horses that qualify for a bet. There are a couple of systems that use that tote board

and require no past performances. These are systems that Ken Osterman has used successfully at race and sports books. The rules for each system are clearly explained, so it is understood why they work. Tips for improving these systems are also provided. Here is the list of the systems Thoroughbred 1 Best Jockey - Long Shot Method 2 Bet the Fastest Horse 3 The B6 Sprint System for Thoroughbreds 4 A Beaten Favorite System 5 Class on the Turf 6 The New Low Claiming Price Angle 7 The Route Speed Method 8 Three Strikes and You're Out - A Maiden Claiming Route Angle 9 An Australian Thoroughbred Betting Method - Show a profit down under Quarter Horse 10 The Hidden Speed Horse Angle 11 The Quarter Horse Speed Index Method 12 A Quarter Horse Elimination Method Harness racing 13 The Qualifier Advantage 14 Morning Line Overlay 15 The Quick Rating Method for Harness Racing 16 The Non-Winners of X Races Lifetime Angle Tote Board Methods 17 Tote Board Magic 18 Tote

Board Magic II 19 Betting Favorites Using the Modified d'Alembert Betting Method A fully researched online betting system for the game of Baccarat. Your odds of winning can be up to 96% or more. Imagine if you had an Almanac with tomorrows sports results and events? Imagine what you could do if you knew the outcome before it actually happened. Impossible? This book teaches you how sports investing works and how you can win consistently from sports betting. Sports has been my life since childhood. I was trying to crunch the code to predict tomorrow's games. In fact, this may sound a little bit like a back to the future fairytale, but I've come as close as I can to the results of Tomorrow's Almanac. During the last 13 years, I've been gathering sports data for Major League sports like Major League Baseball, Nhl Hockey, the NFL football and NBA basketball. I'm crunching the numbers and I'm comparing the stats. I'm analyzing and back testing everything for years and years to crack

the sports code and to find those repeating patterns and trends. This makes me understand what makes teams win and what makes teams lose. And you know what I found? I found that history always repeats itself. This is true, especially in sports where the rules are strictly defined. The outcomes in these situations are very predictable. Of course there are lucky strikes and conditions that are impossible to put into perspective. However, those are very small percentages. If you know the past outcome of an event, you can predict the results for the game in similar circumstances with a high degree of probability. As I said before, the past is never a full indication of what will happen in the future and there is always room for surprises, but again, this is what makes sports fun to watch. Am I right? However, what is the chance that a team with similar power and player statistics will produce a similar outcome in a similar game in similar circumstances? What's that percentage? 86.5% that's right. An 86.5% of the

cases there will be no surprises and the prediction will come absolutely. The Zcode investing software is the best system in the market because it keeps making investors consistent gains each and every month. Truth is we love sports, but we hate to gamble and that's why we call this sports investing, which is similar to any other trading like stocks, stock options, and forex trades. This is just way more predictable than today's flawed economic models with crisis's and bankruptcy events. Every day the software is gathering thousands and thousands of sports data and results: every single event, every single detail, every single player and every single team. I start the simulation with over 80 parameters in the zcode formula to come up with a precise and easy to use prediction and not only tell you who is going to win, but also and most importantly, where the value is, which means more money can be made guessing. To learn more about how you can create a consistent \$1500 monthly from sports

Journey "inside the numbers" for an exceptional set of

statistical tools and rules that can help explain the winning, or losing, ways of a basketball team. *Basketball on Paper* doesn't diagram plays or explain how players get in shape, but instead demonstrates how to interpret player and team performance. Dean Oliver highlights general strategies for teams when they're winning or losing and what aspects should be the focus in either situation. He describes and quantifies the jobs of team leaders and role players, then discusses the interactions between players and how to achieve the best fit. Oliver conceptualizes the meaning of teamwork and how to quantify the value of different types of players working together. He examines historically successful NBA teams and identifies what made them so successful: individual talent, a system of putting players together, or good coaching. Oliver then uses these statistical tools and case studies to evaluate the best players in history, such as Magic Johnson, Wilt Chamberlain, Bill Russell, and Charles Barkley and how they contributed to

their teams' success. He does the same for some of the NBA's "oddball" players-Manute Bol, Muggsy Bogues, and Dennis Rodman and for the WNBA's top players. Basketball on Paper is unique in its incorporation of business and analytical concepts within the context of basketball to measure the value of players in a cooperative setting. Whether you're looking for strategies or new ideas to throw out while watching the ballgame at a sports bar, Dean Oliver's Basketball on Paper will give you amazing new insights into teamwork, coaching, and success. Written to help readers become more successful and profitable traders in sports betting, this guide teaches practical techniques and strategies that will help bettors to set themselves up for betting success. In Betting on Blackjack, expert Fritz Dunki-Jacobs reveals his strategies for consistent winning at blackjack--from how to pick the right place to play to knowing when to stop. With Dunki-Jacobs's proven system, players can win repeatedly by

knowing the probabilities of the game and analyzing the betting strategies and attitudes connected with achieving ongoing successes at the tables. Betting on Blackjack shows you how to maximize profit by: establishing achievable goals in realistic time frames choosing a casino that has the most favorable rules spotting the right table and sitting in the most advantageous position employing mathematically proven betting strategies overcoming the belief that the house always comes out ahead adjusting your strategy for single and double deck versus multiple decks recovering any losses quickly and more Betting on Blackjack also shows you how to apply these betting techniques to blackjack's popular offshoot, Spanish 21, as well as baccarat. With this book in hand, you're sure to come away from the table a winner! This classic of advanced statistics is geared toward graduate-level readers and uses the concepts of gambling to develop important ideas in probability theory. The authors have distilled the

essence of many years' research into a dozen concise chapters. "Strongly recommended" by the Journal of the American Statistical Association upon its initial publication, this revised and updated edition features contributions from two well-known statisticians that include a new Preface, updated references, and findings from recent research. Following an introductory chapter, the book formulates the gambler's problem and discusses gambling strategies. Succeeding chapters explore the properties associated with casinos and certain measures of subfairness. Concluding chapters relate the scope of the gambler's problems to more general mathematical ideas, including dynamic programming, Bayesian statistics, and stochastic processes. Dover (2014) revised and updated republication of the 1976 Dover edition entitled *Inequalities for Stochastic Processes*. make a profit? What if you backed the draw in every Premier League game last season? What if you backed over 2.5 goals in games with teams that have a high goal-average? The answers to your questions are just a few clicks away. Big Data Analysis is now freely available to the ordinary punter thanks to Betaminic and its revolutionary Betamin Builder Tool. Over 100,000 matches since March 2012 in 54 leagues. Have you ever wondered how some professional gamblers make their strategies? Are you tired of making your own excel databases in the search for a winning system? This book is a step-by-step guide to using the Betamin Builder Data Analysis Tool for creating soccer betting systems to beat the bookies including 21 winning strategies in the Colossus21 System Includes: Betaminic User Guide 9 public strategies combined in the Betaminic Super9 system (averaged 349 points profit per year since 2012) 21 strategies combined in the Colossus21 system (averaged 1,049 points profit

per year in the past 6 years) Betting bank, stake size and staking plan analysis Example start-up plans Troubleshooting guide to help you stay on target All 30 strategies are analysed in depth with factsheets that show the premise of each strategy, profit, yield, losing streaks, bet number, average odds, strike rate and maximum drawdown. Each four-page factsheet is an easy at-a-glance way to see a breakdown of profit by year and month. This includes information not shown on the Betaminic website: the percentage of winning months, longest winning and losing runs in months, average monthly and yearly profit, profit range per year and per month, average number of bets per year and per month. (See my website for a free example factsheet, the address is on the back cover.) If you are not using Betaminic, this book will introduce you to a new world of winning football betting strategies. If you are already using Betaminic, this guide book will help you get the most out of it and put you on the path to even greater

profits. Betaminic is a powerful tool for finding strategies that make consistent profit over the long term. You can find them yourself by researching your ideas and gut feelings about football. This does, however, take time and that is why I present here twenty-one working strategies that you can use as they are or adapt according to your own ideas. All of the data in the factsheets is useful to get a feel for a strategy. We want to know how profitable it is, what kind of risk we need to be prepared for and how many picks we can expect each month. Also, we want to know the bad streaks, when they happened, how bad they were, how volatile each strategy is. We can get this information by using the tools in the Betamin Builder, but with this book you can have them all in one easy to view, standardized format so that you can refer back to them easily at a glance to compare current performance to past results and make sure you are on the right path to profit. The key thing we will see from all of these strategies is that they

all made profit over the long term and also that they all had losing months, sometimes multiple losing months in a row. We will see that some strategies have a great yield but few picks each month, while others with lower yields generate more profit faster through a higher volume of bets each month. The Colossus21, which is a combination of all the strategies, will show that by not putting all your eggs in one basket, and spreading the risk across as many strategies as possible, you could have achieved profit almost every month. 70 out of 72 months ended in profit from March 2012 to February 2018. While past results are no guarantee of future performance, we can have reasonable expectations that we have found a winning strategy. Sports betting is the ultimate gambling game, combining the intellectual challenge of handicapping with the excitement of sports that we would all pay to watch anyway. But beating the bookmakers is tough, and after paying the vigorish, almost all bettors lose. To become one of the select few

who makes money betting sports, you need a plan. This Betting strategy Workbook has everything you need! In this book, you will be guided on: - How to avoid some of those treacherous pitfalls and show you how to not just survive, but thrive in this industry. - Many tried and true strategies for winning at sports betting. - Personal experiences with various betting systems, as well as some interesting research on other methods. - Four major sports (football, baseball, basketball, and hockey), breaking down some of the most profitable ways to increase your bankroll in each one. And this is the sports gambling book you can bet on! In the first volume of Gambling Edition, the German sports betting expert Steve Hennings introduces you to the different strategies of sports betting. The so-called combinations- or system bet is explained in an interesting, yet understandable manner. Many have tried and failed to come up with some sort of "system" to beat the odds at Roulette. And many have sold supposed "fool-

proof” strategies “guaranteed: to make their customers rich, strategies that ultimately have proven to be foolhardy. The truth is that there is no guaranteed system that will ensure riches in the game of Roulette or any game of chance. But that doesn’t mean you can’t shift the odds in your favor. This strategy isn’t meant to give readers false hope that one day they’ll be jet-setting millionaires laughing about how they made their fortunes in the casinos. No. That’s just a fairy tale that charlatans use to sell you their latest scam. How important is Sports betting systems to the user organizations mission? Baccarat PRO! A successful bettor looks for 'signals' that inform him out of the patterns of the game he is playing. These are 'clues' as to the likelihood that something might occur. Making calculated judgements as opposed to not, is what distinguishes the professional gambler from the causal bettor. The latter relies upon luck, whereas the former seeks certainty in the signals he recognises; signals that have been proven to come good. You cannot measure luck from Shoe to Shoe, but to a large degree you can measure the probability of what kind of Shoe Trend is forming as you study the patterns that the Banker and Player outcomes form. Learn how to see what only professional Baccarat bettors see and you step out of the luck factor into the skill factor. In this book I show you how you can identify the four main Shoe Trends that will set you apart from the causal Baccarat player. I will address the problems most Baccarat players face and will write how you can turn confusion into order to better profit over an

average Baccarat player and thereby give the house a good fight against the edge that it has. This book contains systems and angles for all four of the major sports in the United States. Professional football, basketball, hockey and baseball are all covered. In addition, college basketball and college football are covered. Some of these are easy to use angles, but others are more complex systems that form a strong foundation for sports handicapping that can be improved upon by smart handicappers. These systems are The Quick Line Method (NFL), The Underdog Advantage (MLB), The Road Dog Method (NHL), The Point Spread Overlay Method (NBA), and The Betting Odds Analysis Methods for college basketball and college football. These systems have been developed and used successfully by Ken Osterman at race and sports books throughout Las Vegas. The rules for each system are clearly explained, so it is understood why they work. Tips for improving these systems are also provided. The following is

the complete list of angles and systems: NFL Football - The Injured Star NFL Football - The Hat Trick NFL Football - The Quick Line Method NFL Football - Calculating Over and Under Baseball - The AAA Surprise Baseball - The Underdog Advantage NHL - The Road Dog Method NBA Basketball - The Point Spread Overlay Method College Basketball - The Betting Odds Analysis Method College Football - The Betting Odds Analysis Method Appendix - Mistakes to Avoid About the Author Ken Osterman has been developing systems, methods, and angles for a wide range of gambling games and sports wagering activities for more than 25 years, and successfully applying them at various casinos and sports books. He spends his time writing and playing his favorite systems in casinos and sports books throughout his hometown of Las Vegas, Nevada. In 1956, two Bell Labs scientists discovered the scientific formula for getting rich. One was mathematician Claude Shannon, neurotic father

of our digital age, whose genius is ranked with Einstein's. The other was John L. Kelly Jr., a Texas-born, gun-toting physicist. Together they applied the science of information theory—the basis of computers and the Internet—to the problem of making as much money as possible, as fast as possible. Shannon and MIT mathematician Edward O. Thorp took the "Kelly formula" to Las Vegas. It worked. They realized that there was even more money to be made in the stock market. Thorp used the Kelly system with his phenomenally successful hedge fund, Princeton-Newport Partners. Shannon became a successful investor, too, topping even Warren Buffett's rate of return. *Fortune's Formula* traces how the Kelly formula sparked controversy even as it made fortunes at racetracks, casinos, and trading desks. It reveals the dark side of this alluring scheme, which is founded on exploiting an insider's edge. Shannon believed it was possible for a smart investor to beat the market—and William

Poundstone's Fortune's Formula will convince you that he was right. This book is for you who want to make money from football betting and to avoid losing money because of psychological traps. You will find 30+ hidden traps that usually make people losing money. You may not know them before, but I am sure you have experienced many of them during your betting. Understanding those traps and following my advice will save you thousands of dollars. Besides, you will find the tips to help you optimize your bets and stakes. *Learn How To Make Money And Find Your Way To Financial Freedom With Betting On Sports* Did you know that through a longer period, over 95% of all bettors end up as losers? Did you know that as many as 97% of all bets collected by sports bookmakers are losing ones? How are we able to lose as much as 97% of bets in one tennis match, where two opponents are equal, and prospects are 50:50? On the following pages, you will find detailed: tips, rules, information and many

systems and strategies. It is time to convert your daily defeats with sports bookmakers and turn them into victories; that will improve your finances. In the beginning, the most important thing is to understand, that it is hard to beat sports bookmakers but not impossible. Sports bookmakers have on their side mathematical advantage. You will find out through this book what are the most common beginner mistakes in the world of sports betting and how to eliminate them. I also describe in the book the rules of sports gambling which every bettor (you), must not only know but also strictly implement in their betting. With my long-term research, I have gathered many mathematical and logical systems of betting. Many of them were casino systems which needed adjustment, so we can use them in sports betting. The book contains a special chapter on 'money management' that is a key factor for each bettor and brings many rules which will help you to distribute your resources properly and prevent possible financial collapse.

If you want to neutralize the advantage of sports bookmakers, it is necessary to understand how they work, and what the secret of their success is! You will recognize the safe and value bet, and you will know how to turn the mathematical advantage into your advantage. Introduction The title of this book is a bold statement and one cannot really state this unless you put your money where your mouth is! I have written many books around UK horse racing systems and this one I really enjoyed due to the simplicity of this horse racing system and how easy it is to apply. The system uses the excellent free racing post website where you can obtain all the form data you need to use this system. Plus you do not have to be a

form expert to understand it. I personally think horse racing pundits make heavy weather of horse racing form, i.e. looking at a horse's breeding and many other factors. I think this information just confuses the average punter. I have added a special bonus horse laying system in this book and I think you will enjoy it! This laying system is so easy to follow you will look back at all the bets you have placed in the past and wonder how did I get it so wrong! Yes it will hurt knowing how much money you lost when you should have not. Moving back onto the horse backing system, picking winners will be very easy for you and even more you will gain confidence and control in your betting. This horse racing system normally picks 2 to 3 horses per day in UK handicap horse racing markets. You should aim at using Betfair to place your bets due to the better prices and in-play tactic I will show you in this book. Understand the system before placing bets, I hope you enjoy it! Besides, you will find the tips to help you optimize your bets and stakes. On the face of it choosing what side to bet on, when to bet and how much to wager when you do bet might seem like an easy task. However when it comes to generating profits like a pro these three aspects of gambling on even money options can turn into a complex and at times brutal experience rendering strong minds powerless. The house edge will be the least of your worries. The dance of the sides will form into four different kinds of trends. By the end of a session you will feel like you have played space invaders at a fast level yet all along the outside chances on roulette, Low/High, Even/Odd and Red/Black, or

Player/Banker on baccarat and other even money casino games only have two sides. The system of this book adds on a set of rules to the workings of the two sides and the outcomes they form so as to closely mimic those forming patterns. Tabone's Clockwork Betting System is equivalent to an AI add on that makes all of the predictive decisions for you thus removing the confusing and often emotional decision making process so you can enjoy the game like a sophisticated bettor. This is a follow-up to the popular first book in the series, "Sports Investing: Profiting from Point Spreads," which remains a top-selling book in its sports gambling category. This book focuses on specific college football betting systems and strategies. The book remains true to the philosophy of contrarian value in sports investing. In particular, the authors reveal betting systems and parameters that they have used to successfully navigate the college football sports marketplace. Almost everybody loses money betting on college

football, except the so-called WiseGuys. When you read this book, you'll know why. The author reshaped himself from a steady loser into a constant winner as a college football gambler. His ground-breaking method stands alone in the betting world today. Unlike others, who follow volumes of data, Raleigh Randall distilled that process down to three key factors. He started posting his picks on Facebook for fun in 2017 and produced a whopping 72% ROI track record. Coupled with a 57% win rate on his bets, this record dwarfs that of the most famous online "cappers." Randall also created an online course for his method. However, you need no more than what is revealed in the book to create your own 3-Deep Betting System. There's no fluff - just step-by-step instructions for every part of the process - with logic to support them. You'll learn what data you need, where to get it, and how to use it. If you want to step away from the (losing) crowd and become a winner, this book is for you. You'll learn how to treat college football betting

like a business. Learn this system and trade in the highs and lows for low-risk betting and a steady income stream. Yes, it's still speculation but the chances of success can be maximized if one doesn't bet on a whim but develops a sound sports betting strategy. This book provides no quick fix formulas but gives you the tools and intellectual framework to develop your own sports betting strategy based on your individual knowledge and abilities. The author analyzes the game of sports betting, why most people lose and ways those common mistakes can be avoided. Basic strategies (The Underdog, The Favorite and Diversification) and their limitations are analyzed in depth and insight is provided into just about every aspect

of strategic sports betting from emotional discipline to developing your own system. Ninety percent of people betting on sports lose. If this little book won't provide a fixed formula for success, it will put you that much closer to the winning ten percent. The 4th book in The Devil's Gambling System series, Baccarat is next to be beaten! For long, Baccarat has been associated with high-rollers and the financial elite, but luckily this image is starting to fade, as more and more people start playing what experts call "perhaps the best game in the casino". Baccarat is famous for its simplicity and low house-edge, aspects that attract new players every day to give this elite game a try. Since Baccarat is considered a "guessing-game", gambling experts stopped trying to find a way to beat the system, so it became the gamblers' duty to come up with a method to take the casino's money. While all gambling systems require some level of luck, the Devil's Baccarat System take a mathematical approach to the statistics and probabilities

behind each outcome and combines both Progressive betting systems and Sequencing systems to form one complex betting strategy, which, if lucky can beat the casino on the bets that matter! Keep in mind that no gambling system is fool-proof, so if anyone tries selling you a betting or predicting system that they promise is perfect, be aware of the lies! The Devil's Gambling System series does NOT make false promises, but instead develops and teaches the best proven methods to diminish the house edge and to get the best possible odds for your bets. Gamble smart, gamble well, gamble like the Devil!!!
