Between Copernicus and Galileo Jan 19 2020 Between Copernicus and Galileo is the story of Christoph Clavius, the Jesuit astronomer and teacher whose work helped set the standards by which Galileo's famous claims appeared so radical, and whose teachings guided the intellectual and scientific agenda of the Church in the central years of the Scientific Revolution. Though relatively unknown today, Clavius was enormously influential throughout Europe in the late sixteenth and early seventeenth centuries through his astronomy books—the standard texts used in many colleges and universities, and the tools with which Descartes, Gassendi, and Mersenne, among many others, learned their astronomy. James Lattis uses Clavius's own publications as well as archival materials to trace the central role Clavius played in integrating traditional Ptolemaic astronomy and Aristotelian natural philosophy into an orthodox cosmology. Although Clavius strongly resisted the new cosmologies of Copernicus and Tycho, Galileo's invention of the telescope ultimately eroded the Ptolemaic world view. By tracing Clavius's views from medieval cosmology the seventeenth century, Lattis illuminates the conceptual shift from Ptolemaic to Copernican astronomy and the social, intellectual, and theological impact of the Scientific Revolution.

Textbook of Cancer Epidemiology Feb 18 2020 "Comprehensive and comprehensible, but also encouraging -- informed by the hope and belief that informed its creation." -Cancer Amid sweeping advances in the science and treatment of cancer, the TEXTBOOK OF CANCER EPIDEMIOLOGY offers students and professionals a definitive, systematic resource for understanding the factors affecting all types of human cancer. This fully

updated new edition offers an overview of epidemiology's key concepts and methods as they relate to cancer (including the emerging potential of biomarkers) as well as site-specific chapters on individual cancers' natural history, pathology, descriptive epidemiology, and etiology. Taken together, these chapters forge connections between established science and the ongoing evolution of this dynamic field. Crisply and concisely written by an assembly of internationally recognized researchers, the TEXTBOOK OF CANCER EPIDEMIOLOGY offers a superlative introduction to the subject's consensuses and controversies for those embarking on their careers and a ready reference for seasoned professionals.

Sveti Pavao Shipwreck Jan 23 2023 Between 2007 and 2012 the Department for Underwater Archaeology of the Croatian Conservation Institute from Zagreb and the Department of Humanistic Studies of the Ca' Foscari University of Venice collaborated in the recording, underwater excavation and analysis of the unusually well-preserved wreck of a 16th century Venetian merchantman in the Sveti Pavao shallow off the southern shore of the island of Mljet, Croatia. The shipwreck preserved many personal possessions of the crew as well as a number of bronze artillery pieces and the remains of a cargo of luxury and richly decorated ceramic material from Iznik and other oriental workshops. Although the excavation is not complete, this volume presents the results of the project so far. The methodological and technical aspects of the underwater investigation of the site, mainly by photogrammetry, are described; the historical and archaeological context of navigation in the late Medieval period in the eastern Mediterranean discussed; and the recovered artefacts described and catalogued in detail, together with the remains of the ship and its equipment that, because of depth and of problems of conservation, have been left in situ. The conservation and restoration of the finds are described in an appendix.

Fixed prosthesis with vertical margin closure Aug 06 2021 This text deals mainly with topics regarding traditional prosthodontics, which are still not considered to be out of vogue and represents a procedural guide to the fabrication of full veneer crowns with vertical margin design. Some of the cases share a common conceptual framework with horizontal margin design; however, all of the concepts combine to achieve the goal of an ideal end-point.

24 ore di Le Mans May 03 2021 Il 2023 segna un momento fondamentale per la storia, la cronaca e il mito della 24 Ore di Le Mans. L'evento non solo vivrà il centenario dalla prima edizione, ma festeggerà anche il ritorno ufficiale in gara di un prototipo Ferrari, a mezzo secolo esatto dall'ultima partecipazione ufficiale della Casa. In altre parole, la gara più famosa del mondo, in coabitazione con la Indy 500, celebrerà il ritorno del marchio più amato, creando un cortocircuito virtuoso tra leggenda e passione. Mario Donnini, scrittore e giornalista di Autosprint, già autore del libro Le Mans. 24 Ore di corsa, 90 anni di storia, torna sul tema, e oltre a ripercorrere la storia della Ferrari a Le Mans, svela al lettore una miriade di aneddoti, episodi, retroscena legati ad eroi e personaggi, noti e meno noti, protagonisti di una gara-maratona dalla magia ineguagliabile. Cardiovascular Genomics Sep 26 2020 In this book/CD-ROM package, Raizada (physiology and functional genomics, University of Florida) brings together scientists and clinicians from around the world to explore recent molecular approaches to understanding the cardiovascular system in health and disease. Contributors cover disease states ranging from vascular and cardiac dysfunction to stroke and hypertension, and describe methods for identifying the genes that cause susceptibility to cardiovascular diseases. The CD-ROM contains an electronic version of the book that can be used on a PC or PDA. The audience for the book includes cardiovascular researchers, clinical fellows, and pharmacologists. 8 Billion and Counting: How Sex, Death, and Migration Shape Our World Oct 28 2020 A provocative description of the power of population change to create the conditions for societal transformation. As the world nears 8 billion people, the countries that have led the global order since World War II are becoming the most aged societies in human history. At the same time, the world's poorest and least powerful countries are suffocating under an imbalance of population and resources. In 8 Billion and Counting, political demographer Jennifer D. Sciubba argues that the story of the twenty-first century is less a story about exponential population growth, as the previous century was, than it is a story about differential growth—marked by a stark divide between the world's richest and poorest countries. Drawing from decades of research, policy experience, and teaching, Sciubba employs stories and statistics to explain how demographic trends, like age structure and ethnic composition, are crucial signposts for future violence and peace, repression and democracy, poverty and prosperity. Although we

have a diverse global population, demographic trends often follow predictable patterns that can help professionals across the corporate, nonprofit, government, and military sectors understand the global strategic environment. Through the lenses of national security, global health, and economics, Sciubba demonstrates the pitfalls of taking population numbers at face value and extrapolating from there. Instead, she argues, we must look at the forces in a society that amplify demographic trends and the forces that dilute them, particularly political institutions, or the rules of the game. She shows that the most important skills in demographic analysis are naming and being aware of your preferences, rethinking assumptions, and asking the right questions. Provocative and engrossing, *8 Billion and Counting* is required reading for business leaders, policy makers, and anyone eager to anticipate political, economic, and social risks and opportunities. A deeper understanding of fertility, mortality, and migration promises to point toward the investments we need to make today to shape the future we want tomorrow.

An Integrated Approach for an Archaeological and Environmental Park in South-Eastern Turkey Sep 07 2021

This book reports on a public archaeology project carried out at the ancient site of Tilmen Höyük in south-eastern Turkey. The project developed and applied new methodologies and advanced technologies for the planning, design, conservation and management of an archaeological park at a site of high cultural, environmental and touristic interest, representing a significant study case for other archaeological sites in the Mediterranean area and beyond. It highlights state-of-the-art techniques of remote sensing, both for archaeological surveying and for territorial and environmental analysis through the study of high-definition aerial photos and digital photogrammetry. It also takes into account the ecological and environmental characterization data elaborated by environmental and botanic experts, fundamental for the purposes of eco-sustainability and management of the site, through climate and ground measurements aiming at vegetation control and a management model for the archaeological site itself and its green areas of outstanding naturalistic interest. Further, the book comprehensively discusses the analysis of the state of preservation of the archaeological remains and their effective conservation based on a set of measures guided by the principles of minimum intervention, feasibility and low impact on the remains, the site and its landscape. Moreover, it presents novel devices and fixed structures aimed at protecting the fragile archaeological remains and allowing safe access to visitors to the newly created archaeological park. At the intersection of archaeology, architecture and natural sciences, this book appeals to researchers and specialists in archaeology, social sciences, environmental sciences, conservation, architecture and engineering disciplines.

The Baths of Acqui Jul 17 2022 "The great future ambitions of Acqui, a European spa city, are rooted in its history, of which this book tells the story. As in other localities that were made famous (and attractive) by their thermal waters, it is the spa that has given rise to its economic well-being and, especially, to its historical identity and memory. Centuries of use of its curative mud and waters brought with it great buildings for accommodation and treatment, though the city truly took off in the late nineteenth and early twentieth century. However, unlike many international centres of relaxation and recreation, Acqui has always been a place more for treatment than for leisure. Though never built, the architectural designs of the 1920s were extraordinary in terms of their spatial and design solutions, and still today they point to an age of enormous ambition, accompanied by a grand vision for the city and its spa system. A vision in which the city believes as much today as ever before."--Publisher.

Tietz's Applied Laboratory Medicine Feb 24 2023 Using a problem-based approach, Tietz's Applied Laboratory Medicine, Second Edition presents interesting cases to illustrate the current use and interpretation of the most commonly available clinical laboratory tests. The cases present detailed descriptions of the symptoms, diagnosis, and treatment of disease. The book begins with an up-to-date general discussion of selection and use of laboratory diagnostic and prognostic tests. Cases are then grouped by category, including cardiovascular, pulmonary, renal, liver, gastrointestinal, endocrine, gynaecologic & obstetrical, haematological, CNS, lipid, congenital, toxicological, infectious, and autoimmune diseases. Tietz's Applied Laboratory Medicine, Second Edition: Presents over 100 cases organised by disease group Reflects latest treatment and risk factor guidelines, testing algorithms and recommendations Newly covers coagulopathies, infectious diseases, and autoimmune diseases Provides excellent coverage of relevant pathophysiology and biochemistry, and includes cases in molecular diagnostics Discusses legal implications This book is an invaluable resource for all clinical chemists, clinical lab technologists, pathologists, and allied health professionals. It is also of interest for general practitioners, residents, medical students, and educators.

Applied Laboratory Medicine Jul 05 2021 Presents the clinical aspects of disease in the context of readily acquired diagnostic data. Organized by body system, 70 of the most common disorders, including AIDS, are featured in case study settings. Contents include diagnosis determination through the presentation of patient history, clinical evaluation, and laboratory and other diagnostic data. Each chapter follows the diagnosis determination with a discussion of differential diagnosis, definition of disease, and a brief principle of treatment.

Cardiovascular Biomarkers Nov 16 2019 In the four pages committed to a discussion of myocardial infarction in the first edition of Harrison's Principles of Internal Medicine, published in 1950, there was no mention of use of the laboratory for management of patients. Thirty years later, when the first edition of Braunwald's Heart Disease, A Textbook of Cardiovascular Medicine was published, 2 out of the 1943 pages in the text contained a discussion of the laboratory examinations in acute myocardial infarction. Our knowledge base of the multitude of ways that physicians can and should use the clinical chemistry laboratory has expanded dramatically since these classic texts were published. The nomenclature has changed: terms such as "cardiac enzymes" have given way to "cardiac biomarkers." The number of assays has multiplied, and the operating characteristics of available assays are improving at a gratifying but dizzying rate. We now use biomarkers to diagnose cardiovascular diseases and also to frame our treatment strategies. Thus, there is a clear need for a scholarly compilation of the state of the art of cardiac biomarkers. Dr. David Morrow has expertly edited an authoritative book that answers this need. The 34 chapters in Cardiovascular Biomarkers: Pathophysiology and Disease Management were written by a group of individuals who are internationally recognized thought leaders and experts in clinical and laboratory medicine.
